Nuclear medicine trainees will be expected to combine their skills as a physician with that of a physiological imager to solve diagnostic problems. They will provide a unique insight into the pathophysiology of disease and where appropriate offer a radionuclide therapeutic option for treatment.

[Nuclear Medicine-|JRCPTB](#)

Nuclear medicine is a medical speciality involving the application of radioactive substances in the diagnosis and treatment of disease.Nuclear medicine imaging, in a sense, is "radiology done inside out" or "endoradiology" because it records radiation emitting from within the body rather than radiation that is generated by external sources like X-rays.In addition, nuclear medicine scans differ ...
