Project

Seabin Project, a Byron Bay-based envirotech company with technology in 52 countries, has closed the biggest crowdfunding deal of 2020 – raising \$1.8m from around 1,800 investors.

Image from The Australian
This is a tremendous result, despite the growing impact from the COVID-19 pandemic. Seabin CEO Pete Ceglinski recently told The Australian:

Seabin raises \$1.8m: Biggest deal of 2020 | by Matt Vitale ...

Seabin Project have defied the odds and raised a staggering \$1.49M to date.

Dedicated to Professor Peter Buckley, OBE, this volume of Progress in International Business Research explores the new challenges for MNEs, SMEs (small and medium sized enterprises) and INVs (International New Ventures) emerging from this changing and increasingly unpredictable political, economic, social and technological VUCA world.

Kate Nelson has been disposable-plastic free for a decade. She started small: stopping her use of plastic bags and water bottles,

Online Library Seabin Project Crowdfunding

refusing straws and carrying a reusable cup for takeaway coffee. But unhappy with how much plastic she still handled in her day-to-day life, she knew she had to do more. It took years, but Kate has developed effective strategies that others can easily adopt. This inspiring and practical guide to reducing your use of plastic is packed with information, how-to's and tips to help you cook, clean, shop, wear and live plastic-free. Kate shows how to reduce your waste and live more simply and sustainably, no matter where you're starting from. With over 60 recipes--covering nutrition,

The Mess That We Made

Online Library Seabin Project Crowdfunding

explores the environmental impact of trash and plastic on the ocean and marine life, and it inspires kids to do their part to combat pollution. Simple, rhythmic wording builds to a crescendo ("This is the mess that we made. These are the fish that swim in the mess that we made.") and the vibrant digital artwork captures the disaster that is the Great Pacific Garbage Patch. Children can imagine themselves as one of the four multi-ethnic occupants of the little boat surrounded by swirling plastic in the middle of the ocean, witnessing the cycle of destruction and the harm

Online Library Seabin Project Crowdfunding

it causes to plants, animals, and humans. The first half of the book portrays the growing magnitude of the issue, and the second half rallies children and adults to make the necessary changes to save our oceans, before it is too late. Facts about the Great Pacific Garbage Patch, ocean pollution, and how kids can help are included in the back matter.

talk, New York Times bestselling author Reshma Saujani empowers women to embrace imperfection and bravery. Imagine if you lived without the fear of not being good enough. If you didn't care how your life looked on Instagram, or worry about what total strangers thought of you. Imagine if you could let go of the guilt, and stop beating yourself up for tiny mistakes. What if, in every decision you faced, you took the bolder path? Too many of us feel crushed under the weight of our own expectations. We run ourselves ragged trying to please everyone, all the

Online Library Seabin Project Crowdfunding

time. We lose sleep ruminating about whether we may have offended someone, pass up opportunities that take us out of our comfort zones, and avoid rejection at all costs. There's a reason we act this way, Reshma says. As girls, we were taught to play it safe. Well-meaning parents and teachers praised us for being quiet and polite, urged us to be careful so we didn't get hurt, and steered us to activities at which we could shine. As a result, we grew up to be women who are afraid to fail. It's time to stop letting our fears drown out our dreams and narrow our world, along with our

Online Library Seabin Project Crowdfunding

chance at happiness. By choosing bravery over perfection, we can find the power to claim our voice, to leave behind what makes us unhappy, and go for the things we genuinely, passionately want.

Perfection may set us on a path that feels safe, but bravery leads us to the one we're authentically meant to follow. In *Brave, Not Perfect*, Reshma shares powerful insights and practices to help us let go of our need for perfection and make bravery a lifelong habit. By being brave, not perfect, we can all become the authors of our biggest, boldest, and most joyful

life.

Powerful feminist nature writing by the pioneer of women's big-wave surfing in Ireland. Easkey Britton provides a rare female perspective on surfing, exploring the mental skills it fosters, and the need to recognize the value of the ocean and of nature's cycles in our lives. This is an incredibly inspiring exploration of the sea's role in the wellness of people and the planet, beautifully written by Easkey Britton - surfer, scientist and social activist. She offers a powerful female perspective

Online Library Seabin Project Crowdfunding

on the sea and surfing, explaining what it's like to be a woman in a man's world and how she promoted the sport to women in Iran, surfing while wearing a hijab. She speaks of the undiscussed taboo around entering the water while menstruating - and of how she has come to celebrate her own bodily cycles. She has developed her own approach to surfing, which instead of seeking to dominate the waves, works in tune with the natural cycles of her body, the moon and the seasons. In a society that rewards busyness, she believes that understanding the influence of cycles

Online Library Seabin Project Crowdfunding

becomes even more important - and we all have them, men and women. For Easkey, the sea is a source of mental and physical wellbeing. She explores the mental toughness needed in big-wave surfing, and presents surfing as an embodied mindfulness practice in which we can find flow and connect with the movement of the waves. She stresses the need to recognize the ocean as our most powerful ally when addressing our greatest global challenge: the climate crisis. Above all, Easkey's relationship to the sea has taught her about the need to meet life and evolve with it, rather than seeking

Online Library Seabin Project Crowdfunding

to control it. By such wisdom our planet might just survive and thrive.

Although 3D printing promises a revolution in many industries, primarily industrial manufacturing, nowhere are the possibilities greater than in the field of product design and modular architecture. Ronald Rael and Virginia San Fratello, of the cutting-edge San Francisco-based design firm Emerging Objects, have developed remarkable techniques for "printing" from a wide variety of

Online Library Seabin Project Crowdfunding

powders, including sawdust, clay, cement, rubber, concrete, salt, and even coffee grounds, opening an entire realm of material, phenomenological, and ecological possibilities to designers. In addition to case studies and illustrations of their own work, Rael and San Fratello offer guidance for sourcing alternative materials, specific recipes for mixing compounds, and step-by-step instructions for conducting bench tests and setting parameters for material testing, to help readers to understand the process of developing powder-based materials and their unique

Online Library Seabin Project Crowdfunding

qualities.

Beginning to End Hunger presents the story of Belo Horizonte, home to 2.5 million people and the site of one of the world's most successful city-run food security programs. Since its Municipal Secretariat of Food and Nutritional Security was founded in 1993, Belo Horizonte has sharply reduced malnutrition, leading it to serve as an inspiration for Brazil's renowned Zero Hunger programs. The secretariat's work with local family farmers shows

Online Library Seabin Project Crowdfunding

how food security, rural livelihoods, and healthy ecosystems can be supported together. While inevitably imperfect, Belo Horizonte offers a vision of a path away from food system dysfunction, unsustainability, and hunger. In this convincing case study, M. Jahi Chappell establishes the importance of holistic approaches to food security, suggests how to design successful policies to end hunger, and lays out strategies for enacting policy change. With these tools, we can take the next steps toward achieving similar reductions in hunger and food insecurity
